

CONFERENCE THEME: "SCIENCE OF OXIDE MATERIALS IN SERVICE OF DURABLE DEVELOPMENT"

Within this general theme will be circumscribed traditional topics of the Conference:

- Fundamentals of science and engineering of oxide materials (physical-chemistry, mechanisms, processes and operations, modeling of properties);
- Inorganic binders;
- Glass and vitreous-ceramics;
- Traditional and advanced functional and structural ceramics;
- Refractory and thermal insulating materials;
- Concretes, dry mortars, adhesives for ceramic, and others;
- Bio and nano materials, nano-technologies;
- Environment protection in oxide materials industry (including strategies and public politics; assessment of life cycle)
